

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Forest WSC has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 10/01/2024 we did not monitor or test for lead and copper and therefore cannot be sure of the quality of your drinking water during that time.*

The table below lists the contaminants we did not properly test for during the last year, how often we are supposed to sample for lead and copper, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples will be taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples will be taken
Lead and copper tap water sampling	10/3 years	0	June – July 2024	11/2025

### What is being done?

We are working to correct the problem. For more information, please contact:  
Kerry Black at 936-366-0861.
